Erik,

Attached is a rough draft response to Congressional inquiry. We haven't really discussed approach – I assume our response is **Ex. 5 Deliberative Process (DP)**

Talc has its own CASRN (perhaps you already knew that) and is on the TSCA Chemical substance Inventory. If you want to address the talc question head-on, I suppose we need to talk with Steve Anderson. I don't think the problem formulation or TSCA really touch on contamination.

I hope you are enjoying your time with family.

Lea
